Andrés Eduardo Casadiegos Gómez

Systems Engineer

Systems engineer with 2 years of experience in the analysis, development and maintenance of business applications, mainly with .Net C#, Angular and PL/SQL technologies, but always with the willingness to continue learning to grow professionally.

I am a young man passionate about programming, responsible in the assigned tasks, with a competitive spirit and continuous improvement, both personal and professional, looking for opportunities in which to develop all my knowledge.

Work History

2020-08 - 2020-12

Intern - Software Development Engineer

GRUPO EMPRESARIAL CSS SAS, Bucaramanga

Technologies: PHP / Laravel.
Description: Participation in the development of a email advertising marketing system in its beta version.

2021-05 - present

Software development engineer

Norsoft S.AS, Cucúta

Client: Sodexo / Pluxee Colombia
Technologies: .Net Framework, Oracle PL/SQ, .Net 6.0, .Net 5.0, .Net Core 3.1, Angular, SASS, CSS, Javascript, Typescript.
Management Framework: Scrum.
Some Projects I worked on:

- **BILLING MIGRATION**: ERP change that involved developments on Condor, Sodexo's core card system, to consume services in Azure and build stored procedures in charge of migrating customer and affiliate invoices to the new ERP.
- **VIRTUAL CARD:** Developments on Condor, Sodexo's core card system, and on the PaymentGateway microservice for activation of QR payments, to allow customers to request, load and manage virtual cards that are enrolled in their mobile device, to later be able to make payments via QR.
- **MAINTENANCE**: Maintenance work on Sodexo core systems such as: Front-end bug fixes, rest APIs, microservices and database procedures. Changes in the look and feel of the applications, improvements in source code to optimize processes and implement patterns for clean code.
- **NEXOZ - PSE PAYMENT**: Front-end and back-end developments to implement payment with PSE in Sodexo's Nexoz application, a platform where clients can request cash dispersions for their beneficiaries.
- **NEXOZ - DATABASE NORMALIZATION**: Normalization of tables in the database of Sodexo's Nexoz application, under the guidelines of the technical leader of the project, to optimize queries and have a more decoupled and organized database model.

Note: T*hese are some of the projects and tasks I have done. In the link to my portfolio you can find the complete list of all the projects I worked on.*

Education

2016-01 - 2020-12

Systems engineer

Universidad Autonóma de Bucaramanga, Bucaramanga
